

## REIMANN capillary irrigation matting for professionals

Capillary matting	Water retention capacity in l/m <sup>2</sup>	Weight in g/m <sup>2</sup>	Roll lengths in m (Other lengths and widths on request)	Standard widths in cm
Florapol®	approx. 1	100	100 / 200	11.5 / 100 / 125 / 150 160 / 180 / 200 / 220 - 425
Floraplus® 2-layer	approx. 1	200	50	150 / 160 / 165 / 175 200 / 210 / 260 / 420
Floraplus® 3-layer	approx. 1	300	50	100 / 120 / 150 / 165 180 / 200 / 210 / 220
Vivapol®	approx. 3	200	50	100 / 125 / 150 / 160 180 / 200 / 220 - 425
Vivaplus® 2-layer	approx. 3	300	50	140 / 150 / 165 / 180 200 / 210 / 260 / 420
Vivaplus® 3-layer	approx. 3	400	50	100 / 120 / 150 165 / 180 / 200 / 220
Standard*	approx. 3	300	50	11.5 / 100 / 120 / 125 / 150 160 / 180 / 200 / 220 / 250 - 500

Awarded!

\* Recycled fibres

### Cover materials to protect the matting against dirt and algae

Aquafol® black*		40 µ	50 / 100	11.5 / 100 / 125 / 150 / 166 180 / 200 / 220 / 250
Aquafol® white*		40 µ	50 / 100	100 / 125 / 165 200 / 220
Aquafol® symbol**		40 µ	50 / 100	105 / 125 / 205

Microperforated film PE with positioning help, \*with lines \*\*with four distances 12.5, 15, 17.5, 20 cm

Contex® 65		65	100	110 / 130 / 135 / 160 175 / 190 / 210
------------	--	----	-----	--

Light weight PP fabric with high water permeability, suitable for ebb and flood benches as well, black

Contex® black		100	100	100 / 125 / 150 / 165 / 205 262 / 330 / 425 / 525
Contex® white		100	100	up to 525 cm details on demand

Long lasting PP ground cover, permeable, against algae and weed, with squares for easy positioning

### Impermeable film

PE film black		100 µ	200	208 - 1400
---------------	--	-------	-----	------------

100 µ PE film for 200 cm benches or thicker film for wide container areas

## Capillary matting

Fabrics for horticulture

A uniform and perfectly commanded irrigation is the basis for the optimized growing and sale of plants.

## REIMANN - capillary matting

– specially developed for professional horticulture – offer ideal solutions not only for greenhouses and polytunnels but also for outdoor use. They form a pleasant microclimate, assure a better root building in the pot and reduce the risk of boytritis for the plants. Most important are the capillarity and the durability of the matting!

### Compound matting ▶

In order to facilitate the labour process with former three steps (PE-film, cap. matting, cover material on top to protect the matting) the established capillary matting **Florapol®** and **Vivapol®** have been continuously developed to the compound matting products **Floraplus®** and **Vivaplus®** offering lot's of advantages and comfort.

### The advantages

- automatic irrigation
- enormous saving of time
- saving of water and additives
- ideal climate for the plants
- leaves and blossoms will not become wet

### There's nothing more easy!

- makes your business easier
- longlasting
- not only for benches but also for cultivation on the ground

Quality will recompense you!

**Vivaplus®** is highly appreciated for sales areas in garden centres.

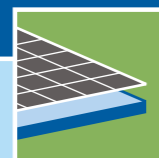

## For growing of young plants, bed and bedding plants...

1 liter/m<sup>2</sup> water retention capacity

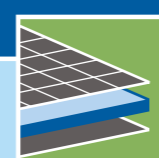

### Florapol®

- capillary matting for growing with a reduced water retaining capacity
- very good and regular water dispersion
- longlasting
- very robust, no shrink
- easy to handle
- weight 100 g/m<sup>2</sup>, white

### Floraplus® 2

- Florapol® united with our UV stabilized ground cover **Contex®**
- for container / lava fields
- very good and uniform water dispersion
- longlasting, very robust, permeable
- widths up to 5.25 m
- weight 200 g/m<sup>2</sup>, black with squares

### Floraplus® 3

- Florapol® united with our UV stabilized ground cover **Contex®** and an impermeable film beneath
- very good and uniform water dispersion
- longlasting and very robust
- widths up to 2.20 m
- weight 300 g/m<sup>2</sup>, black with squares

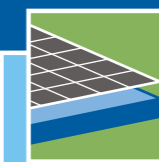

## For growing and selling plants...

3 liters/m<sup>2</sup> water retention capacity

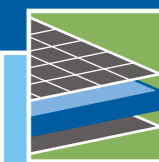

### Vivapol®

- capillary matting with high capillarity
- very good and regular water dispersion
- longlasting
- very robust
- easy to handle
- weight 200 g/m<sup>2</sup>, white

### Vivaplus® 2

- Vivapol® united with our UV stabilized ground cover **Contex®** for container fields
- very good and uniform water dispersion
- longlasting, very robust, permeable
- widths up to 5.25 m
- easy to handle
- weight 300 g/m<sup>2</sup>, black with squares

### Vivaplus® 3

- Vivapol® united with our UV stabilized ground cover **Contex®** and an impermeable film beneath
- longlasting and very robust
- widths up to 2.20 m
- easy to handle
- weight 400 g/m<sup>2</sup>, black with squares

Choose the right product for your individual requirements.
